FOR IMMEDIATE RELEASE

Webinar to focus on best practices for disaster readiness
Join two leading authorities on availability and recovery for an informative discussion

Irvine, Calif. – January 8, 2013 – Vision Solutions, Inc., the world's leading provider of information availability software and services for Windows, Linux, IBM Power Systems and Cloud Computing markets, today announced a webinar on January 17, 2013 to share best practices for disaster readiness with insight from customers who ensured application availability during Hurricane Sandy.

All facets of business depend on technology. When every minute of uptime contributes to profitability, organizations need a solid business continuity strategy to protect business-critical data, applications and servers. This is true for all types of environments including physical, virtual and Cloud.

Attendees will learn:

- The key facets of a world-class Disaster Recovery plan
- Best-practices checklist to ensure readiness
- Vision's solution and services offerings to ensure availability

Registration for the event is free and can be completed online. The webinar will take place Thursday, January 17, 2013 at 10:00 a.m., CST.

Presenters are Pete Robie, senior vice president of customer care for Vision Solutions and Craig Johnson, vice president for research & development for Vision's Power Systems products. Pete is responsible for the Vision Solutions support centers worldwide and prior to joining Vision Solutions, he was the director of Worldwide Response centers for FileNet Corporation. Craig has more than 17 years of experience in the area of high availability and manages a team of experts with over 1,000 years of combined experience on the Power Systems platform. Craig's primary focus is driving innovative, marketing-leading features into our product line.

Quote:
Pete Robie, Senior Vice President for Customer Care, Vision Solutions:
"Disaster readiness is a hot button and is critical to the vitality of today's businesses. In the wake of Hurricane Sandy, we have learned yet again the significance of preparing for scenarios that we anticipate will never transpire. Fortunately, our clients were able to ensure application availability in the throes of this natural disaster and now we can share their best practices so that others can prepare for the unforeseen."
