

## Solutions for the Modern Government Data Center

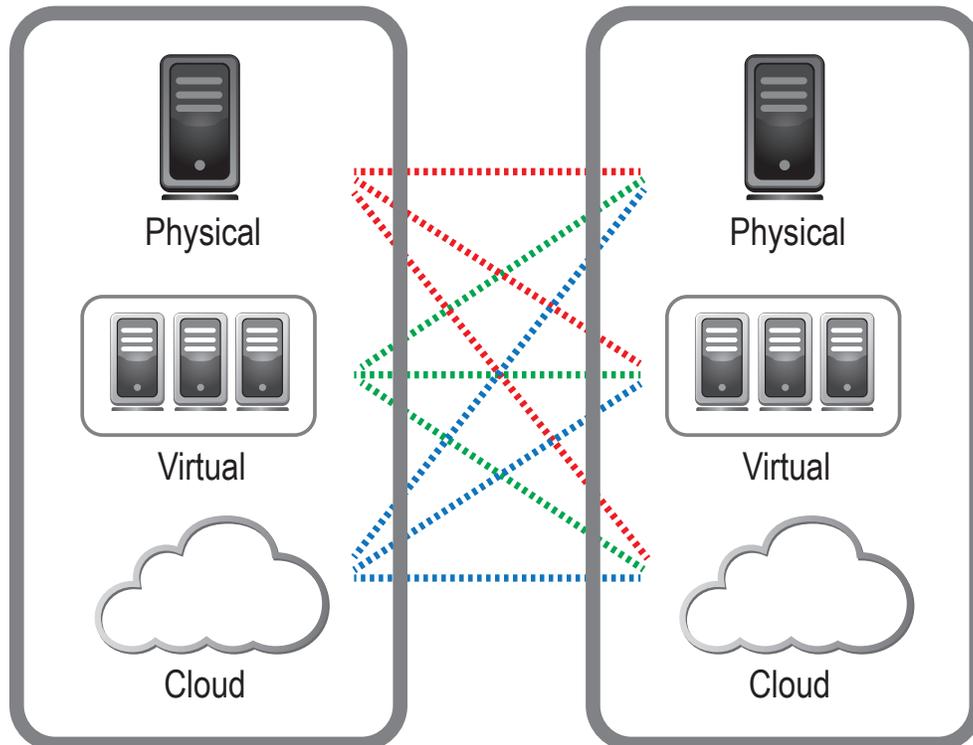

Federal agencies are under constant strain to continue to manage and maintain their legacy systems to keep their critical applications up and running. Budgets are often tight, staff and resources are spread too thin, and aging data centers don't always have the luxury of uniform equipment. Pressing legislation for data center consolidation, security concerns and the need to do more with less is today's Federal IT environment. Taking the steps to modernize and transform your infrastructure is only possible with a single-source of time-tested, government-approved solutions.

Vision Solutions is the only company to deliver migrations, high availability disaster recovery, and data sharing for the most critical of government needs. Our products work

across multiple operating systems, on any storage platform and in any combination of physical, virtual, or cloud-based servers. Perfect for agencies and organizations operating disparate equipment, these solutions easily integrate into your existing environment.

Work across secure IP networks or implement a 256-bit AES encrypted connection between servers for maximum security. And for those starting or bolstering their cloud infrastructure, the hardware-agnostic technology lets you to be selective with the public, private or hybrid cloud you choose today and in the future.

### Migration, High Availability Disaster Recovery

## Why Vision Solutions

### Save Time and Resources with One Solution

Best-in-class near-zero downtime migration that prevents data loss and promotes fast recovery in the event of failure at the primary site. Different agencies can experience the same high performance with one product.

### Plan Your Agencies Roadmap to the Cloud or Easily Go Cloud-to-Cloud

Vision Solutions can help you migrate to Federal Risk and Authorization Management Program (FedRAMP) compliant clouds such as Amazon Web Services (AWS) or Microsoft Azure from any physical, virtual or cloud environment without losing any data.

### Organizational Agility through Data Consolidation

An affordable and secure location for replicated data or a large-scale inter-department disaster recovery plan. Have the ability to allow inter-agency or cross agency collaboration among disparate systems securely to encourage better decision-making based on constantly synchronized information on one consolidated source.

## Always On Always Available

Onboarding your organization or agency to any of our products is quick and simple. With a world class service packs and time-tested technology, your staff can expect nothing less than what we promise. And as your team uses our solutions, here are a few more things they can expect:

### Time Matters in Government

For agencies that experience trouble meeting high federal demands with the limitations of an IT staff that struggles to stay online 24x7, our solutions perform near-zero downtime migration and data sharing. You can even save time by using your existing infrastructure or seamlessly upgrade in the future.

### Multi-Platform Solution

IT environments change from one organization to another. The hardware one agency has used for years may be something another agency hasn't even heard of. Vision Solutions boasts anything-to-anywhere replication with near-universal compatibility and limitless growth. We meet the needs of Windows, Linux, AIX and IBM i Power systems as well as legacy equipment that hasn't been updated in ages.

## Solution Success

### Improving Infrastructure Without Affecting Architecture

One large government organization's overseas field operations ran 1,000 dispersed Windows-based physical servers. Regardless of the condition of an individual servers, all of them faced some risk with difficulty to monitor, manage and protect. Using Double-Take® Availability from Vision Solutions, the organization consolidated their servers on a centralized virtual infrastructure that could be better protected and managed with virtually no downtime.
