Alan Arnold, CTO of Vision Solutions, Named One of Computerworld's 2016 Premier Technology Leaders

Computerworld Recognizes Alan Arnold, Chief Technology Officer of Vision Solutions, as a Distinguished Leader Using Technology to Execute Innovative Strategies and Conquer Challenges

San Francisco, Calif. – November 9, 2015 – Alan Arnold, Executive Vice President (EVP) and Chief Technology Officer (CTO) of Vision Solutions, Inc., has been named one of Computerworld's premier 100 technology leaders. Arnold is honored as a premier technology leader based on major contributions during a time of critical change in his organization. Known for their data migration, high availability, disaster recovery and data sharing solutions, Vision Solutions provides advanced software with the flexibility to deliver business-critical data protection with near-zero downtime across any environment, whether physical, virtual, cloud or hybrid.

Computerworld is a leading IT media brand dedicated to providing insight into enterprise innovation from core-to-edge technologies. Now in its 17th year, Computerworld's Premier 100 Technology Leaders issue highlights the accomplishments of IT leaders, focusing on how they have used technology to positively influence their organizations and employees. The Premier 100 recognizes the business value that technology can bring to an organization and the individuals who execute projects from concept to reality.

"I am honored to be named to Computerworld's list of the top 100 IT leaders. The recognition is a testimony to my team's commitment to infrastructure improvements and innovation which reflect the complexity of systems in today's IT landscape," said Arnold.

As CTO, Arnold is responsible for the global technology, services and support strategy for the business. Since joining the company in 2000, he has held multiple roles at Vision Solutions, including VP of Engineering and Technology, COO, CTO and EVP of Technologies, giving him exposure to customer support, operations and R&D along the way. Arnold has driven significant business growth, leading the company's acquisition of Double-Take Software and other strategic acquisitions that diversified Vision Solutions while also positioning it well for future viability in the market.

Arnold also played a formative role in expanding business partnerships to improve migration solutions for the Windows and Linux space, building upon established relationships. Under his guidance, the company grew into a highly respected partner, well-known for its world-class customer care, which is now critically important since deep technical knowledge in legacy systems is in high demand.

Arnold's commitment to innovation extends beyond his professional career. As a board member of the Orange County Diocese School Board and Board Chairman for the Orange County Catholic Foundation, he has advised the third largest nonprofit organization in the county to develop and implement a wireless network across the school system. The project, which took nearly three years to complete from initial fundraising to implementation, included the engagement of multiple stakeholders. It ultimately resulted in a strong, sustainable IT infrastructure coupled with state-of-the-art curriculum to take advantage of STEM coursework and applied technology across all subject-matter through interactive tools meant to stimulate learning. Both schools were recognized for their growth in large part due to this initiative.

Prior to joining Vision Solutions, Inc., Mr. Arnold was a senior technology executive in the management consulting practice of Ernst & Young LLC. Arnold served as the firm's subject matter expert for IBM technology and e-commerce solutions, and was one of the founders and managers of the Ernst & Young Advanced Development Center (ADC).

About Vision Solutions (visionsolutions.com)

Vision Solutions is the premier provider of software solutions designed to protect data, minimize downtime and maximize data center resources. It is the only company to deliver workload migrations, high availability, disaster recovery and data sharing – across multiple operating systems, on any hardware and in any physical, virtual or Cloud-based environment. Its solutions perform near-zero downtime migration of data, applications and systems and utilize real-time replication to prevent data loss. And its software enables different database platforms to seamlessly share and consolidate data in real-time. Vision Solutions has been serving enterprises and managed service providers for over 25 years through our portfolio of Double-Take®, MIMIX® and iTERA® product brands.
